# Contura 210

## **Breathe new life into your fireplace**

Why let a beautiful fireplace or mantelpiece fall into disuse? Many homes have older fireplaces that are no longer used. Give them new life with the Contura 210. With a compact, free-standing format, it fits easily in most existing fireplaces. It allows you to continue using the fireplace for what it was intended for - to spread warmth and joy to your home. Contura 210 is available with a glass or cast iron door.

## **Standing on its own feet**

Contura 210 can be placed pretty much anywhere you want. The stove can be mounted on top of a wood compartment, which is available as an option, with or without a door, and allows you to store the wood practically and close to hand. With the wood compartment, Contura 210 can be placed on most types of flooring.

*Contura 210 is available in black.  
Front cover: Contura i2G, four-sided frame.*

# Contura i2

## **Create your cosy space**

Do you have your own vision of what a fireplace should look like and feel like? Contura i2 is a fireplace cassette that gives you creative freedom in a practical format that is easy to place. Choose a glass door that amplifies the light from the fire, or a cast iron door for a substantial, more traditional impression. Contura i2 is available with either a three-sided or four-sided frame.

## **Upgrade your open fireplace**

Contura i2 is not only a good choice for you who want to build something completely new. A cassette can also be used to upgrade existing fireplaces. An open fireplace can often draw more heat out of a room than it adds. With a fireplace cassette, a pleasant heat is spread through the glass. Your heating costs will be lower with higher efficiency and cleaner, more modern combustion technology.

*Contura i2 is available in black.*

**New!**

# For every home

Compact, robust, reliable. A timeless design that blends into and elevates the design of every home, from traditional to modern. The Contura 210/i2 series offers freestanding wood stoves as well as fireplace cassettes. Give new life to an existing, older fireplace, or create a completely new fireplace based on your wishes. The choice is yours. Contura 210/i2 is a warm friend for life.

## Thinking inside the box

Contura 210 and Contura i2 are designed and constructed with the latest stove technology from Contura. With the damper in maximum position, it gives the fire an oxygen boost, making it possible to light a fire with the door closed.

With an efficiency of over 80%, you can be sure that the Contura 210 and Contura i2 maximise the amount of heat energy you can get from your firewood, while minimising particulate emissions.

# Completely Swedish.

The design and development of Contura stoves takes place in Sweden, as does the assembly of all stove parts. The products are quality controlled before leaving the factory in Markaryd. This gives us full control over the quality in all stages of production. We take care to ensure that Contura products are suitable for the modern home and conditions. We are proud to mark our products Made in Sweden!

## A Smålander that heats Europe

Contura stoves are made by NIBE in Markaryd, in Småland. Conserving resources has always been a matter of course in Småland and that is why our manufacturing is modern, lean and efficient. Quality permeates every level of production in our factory, which is the largest and most modern facility for the manufacture of stoves in Europe. Our products are sold throughout Europe and are appreciated for their timeless design, efficiency and high quality.
