THE ART OF FIRE

VUORRA

WHO IS VUORRA THE ART OF FIRE

VUORRA is reshaping the design of fire with endless possibilities. Based in the Netherlands, we are a modern brand with deep expertise in the world of Bio ethanol fireplaces — driven by passion, precision, and innovation. From the very beginning, our vision has been clear: to redefine the fireplace experience by merging advanced technology, interior design and reinformed shapes.

We are proud to be recognised as one of the most experienced innovators in the industry – a position earned through our commitment to continuous development, bespoke solutions, and close collaboration with interior professionals and designers across Europe. At VUORRA, safety, sustainability, and customer satisfaction are at the heart of everything we create.

TECHNOLOGY

Innovation is the core of what we do. Our fireplaces feature smart vapor technology and advanced burner systems that ensure clean combustion, intuitive control, and CO₂-reducing performance. The result is a beautiful, sustainable flame — safe, efficient, and easy to enjoy.

QUALITY

From premium materials to meticulous craftsmanship, quality is our signature. Each VUORRA fireplace is built to last, blending refined aesthetics with industry-leading durability.

DESIGN

A fireplace should be more than a source of warmth — it should be an integral part of your interior. At VUORRA, we integrate fire into the design of modern living spaces, offering contemporary, minimalist forms that enhance any environment.

CUSTOM MADE

Every space tells a different story — and our fireplaces are designed to fit seamlessly within it. With our Made to Measure approach, we create custom solutions tailored to each client's space, needs, and vision, ensuring that every fireplace feels personal and unique.

PRODUCT HIGHLIGHTS

LINEA PRO BIO ETHANOL BURNER
This automatic burner features three adjustable flame levels and is available in lengths from 600 mm to 2100 mm.

Developed for flexible installation, it can be used as an immersion burner in non-combustible materials or built into customised fireplace designs.

Control is simple and precise – the burner can be operated directly from the integrated display or by using the supplied remote control.

Each unit includes a dedicated external fuel pump, ensuring safe, clean and convenient refuelling at all times.

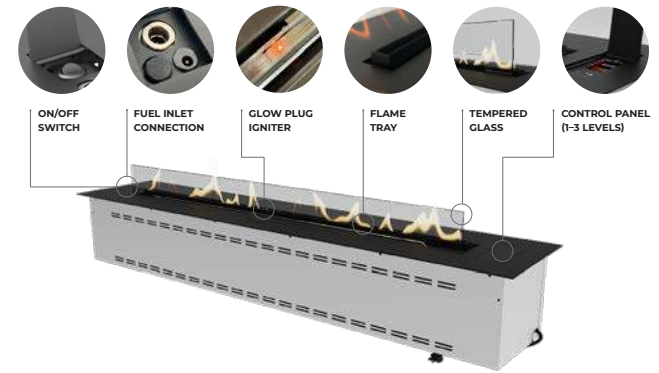

WHAT'S INCLUDED

FUEL PUMP
The automatic pump ensures quick and safe refilling of Bio ethanol, providing both convenience and enhanced safety.

REMOTE CONTROL
With the remote control, operating the electronic fireplace becomes simple and intuitive – ensuring a seamless user experience.

PRODUCT HIGHLIGHTS

LINEA PRO BIO ETHANOL BURNER

This automatic burner offers six adjustable flame levels and is available in lengths ranging from 600 mm to 2500 mm.

It is designed for versatile applications: suitable for use as an immersion burner in non-combustible materials or integrated into built-in fireplace models.

Operation is flexible and intuitive – the burner can be controlled via the integrated control panel, the included remote control, or the dedicated mobile app available for both Android and iOS.

For maximum safety and convenience, each unit is supplied with a customised external fuel pump, ensuring easy and secure refuelling.

WHAT'S INCLUDED

FUEL PUMP

The automatic pump ensures quick and safe refilling of Bio ethanol, providing both convenience and enhanced safety.

REMOTE CONTROL

With the remote control, operating the electronic fireplace becomes simple and intuitive – ensuring a seamless user experience.

SMART CONTROL

The app lets you adjust flames, track fuel, set timers, and control multiple fireplaces – for smarter, simpler fireplace control.

PRODUCT HIGHLIGHTS

CIRULO BIO ETHANOL BURNER

This automatic burner features a distinctive circular design, offering six adjustable flame levels for a refined and dynamic fire experience. Its form creates a natural focal point that enhances balance and visual flow within any interior.

It is designed for versatile integration — ideal for installation into non-combustible materials or within bespoke built-in fireplace models, allowing full creative freedom in architectural design.

Operation is simple and intuitive. The burner can be controlled via the integrated touch panel, the supplied remote control, or the dedicated mobile app available for both Android and iOS.

For maximum safety and convenience, each unit is supplied with a customised external fuel pump, ensuring smooth, clean and secure refuelling every time.

WHAT'S INCLUDED

FUEL PUMP

The automatic pump ensures quick and safe refilling of demineralised water, providing both convenience and enhanced safety.

REMOTE CONTROL

With the remote control, operating the electronic fireplace becomes simple and intuitive – ensuring a seamless user experience.

---	---	---	---	---	--	---	--	--

GLASS COLOR OPTIONS

MODULO FRONT

The open-front design creates a calm, inviting energy — a natural focal point that draws people together and lets the flame become part of the architecture. Ideal for open living areas or reception spaces, it adds quiet drama and depth while keeping the view clean and beautifully balanced.

A clear view into the flame invites stillness and connection — a moment suspended in light. Effortless in form and timeless in expression, it transforms a simple wall into a living statement of warmth and design, where atmosphere and elegance meet in perfect harmony.

MODULO ROOMDIVIDER

Visible from every angle, the three-sided design turns the flame into a living centre-piece — a sculptural element that unites the room and adds depth to the surrounding architecture. It invites conversation and connection, radiating warmth and visual harmony.

Floating effortlessly within the space, it blurs the boundaries between function and art. The clean lines and open perspectives create a sense of lightness, letting the fire breathe freely within modern interiors or open-plan environments.

Ideal for spacious homes, hotel lounges or penthouse suites, it transforms atmosphere into design. Wherever it stands, it captures attention with quiet confidence — elegant, balanced and endlessly captivating.

MODULO LEFT OR RIGHT CORNER

Revealing the flame from one side, this design brings a sculptural sense of direction and flow. It defines the room with subtle asymmetry — guiding the gaze, shaping movement and creating an intimate connection between spaces.

Used as a corner feature or integrated into a wall composition, it naturally draws attention without demanding it. The one-sided opening adds intrigue, suggesting what lies beyond while keeping the experience of fire close and personal.

Balancing architecture and emotion, it enhances the rhythm of a room with soft light and gentle contrast. Perfect for creating warmth and atmosphere in contemporary homes, refined suites or serene lounge areas.

MODULO SEE THROUGH

Designed to connect spaces, the open-back layout lets the flame be shared from both sides — a visual link between rooms that invites flow and continuity. Perfect for passageways or between lounge and dining areas, it offers atmosphere that feels open, elegant and effortlessly alive.

Photo by Huscompagniet

The transparent view allows the fire to define rather than divide, softly illuminating both environments with a sense of harmony. It's a sculptural statement that brings light, depth and balance to contemporary architecture and refined interiors alike.

MODULO THREE SIDED

With the flame revealed across the front and both sides, this design opens the room with light and depth, beautifully contained within the wall. The broad view draws the eye and enhances the architecture, turning the fire into a living feature that anchors the space with warmth and quiet confidence.

Its panoramic presence creates an atmosphere both expansive and intimate, softly reflected across surrounding surfaces and materials. A refined expression of modern design, it brings harmony, depth and understated sophistication to any contemporary interior.
